

Scientific™ C31 Scale & Corrosion Inhibitor – to Launch Soon

Lonza Water Treatment's first scale and corrosion inhibitor to be available in 2017.

- Multiple effect product with impressive stabilising, sequestering and dispersing properties.
- Can be used for potable water treatment applications.

One pouch of 800g packs a powerful punch! A relatively small amount of product will treat a large amount of water – 5g of product per 1000L. The Scientific™ C31 Scale and Corrosion Inhibitor can be used for water treatment applications, including potable water. The product is a multiple effect product with outstanding stabilising, sequestering and dispersing properties.

Supplied in a case of 12 units.

To be added to the water via an approved Lonza feeder system.
