

HTH Scientific® Reservoir Floater & Refill – Product Rebrand

New HTH Scientific® rebrand continues and now reaches the HTH Scientific® Reservoir Floater & Refill

- Rebranded product: new fresher look and feel.
- Still the trusted bactericide and fungicide used in water reservoirs.
- No power or input required.
- Adjustable dosage rate.

A great means to disinfect water in larger reservoirs, from 70kl and up. The HTH Scientific® Reservoir Floater & Refill provides continuous disinfection without the need for power or input. For every 45kl used, one floater will be required and will last for approximately 15 days. Available in Quarter 3 of 2017.

HTH Scientific® Reservoir Floater: Supplied in units.

HTH Scientific® Reservoir Refill: Supplied in a case of 6 units.
