

Citrine-Plus™ Granular Algaecide

Ideal for bottom-growing filamentous algae

Citrine-Plus™ Granular Algaecide

Aids in controlling bottom-growing algae including Chara and Nitella. This product can be used in lakes, potable water reservoirs, ponds and fish hatcheries.

Application

For manual dosing applications or can be applied via a Lonza Granular Feeder.

Application Rate: Shallow (<0.3m) -> 4.5g per m²

Deep (>0.3m) -> 6.72g per m²

Spot treatment ->6.8g per m²

Do not use in waters containing Koi and hybrid goldfish or other copper sensitive fish. Not intended for use in enclosed-type small volume, garden pond systems that typically operate with pumps and filters.

Typical Properties	Product Packaging
Appearance	Solid Blue Granules
Odour	Amine
Active Ingredient	Copper Ethanolamine Complex
Slightly soluble in water	

Advantages

- Granular form for easy treatment in deeper waters or waters where bottom-growing algae may be found
- Visible reduction in algae growth 1 - 2 days after application
- Once treated, water is safe for the consumption for animals and livestock and may be used for swimming purposes
- Chelated formula
- Registered with the South African Department of Agriculture, Forestry and Fisheries (DAFF) – Registration Number L9043 of Act 36/1947
- Meets South African National Standards SANS 241-1:2015 and SANS 241-2:2015 potable water standards
