

## Citrine-Ultra™ Algaecide

Effective broad range algaecide  
emulsified with a penetrating surfactant

### Citrine-Ultra™ Algaecide

A premium solution, Citrine-Ultra™ Algaecide is emulsified with penetrating surfactant which allows increased activity on 'hard to control' algae. A highly effective control for coarse (thick cell-walled) filamentous algae, mucilaginous (colonial) planktonic algae, and Chara and copper-sensitive vascular aquatic plants. This product controls planktonic forms; green and golden algae and diatoms; filamentous forms, and benthic (bottom-growing) attached forms. It has also been proven effective in controlling the rooted aquatic plants, Hydrilla Verticillata, Egeria Densa and other copper-sensitive species. Citrine-Ultra™ Algaecide can be used in lakes, potable water reservoirs, ponds, fish hatcheries and raceways; crop and non-crop irrigation conveyance systems (ditches, canals and laterals).

### Application

Direct application or via a drip doser.

Application Rate: Minimum – 1.837 mL per m<sup>3</sup> @ 0.2 ppm  
Maximum – 9.189 mL per m<sup>3</sup> @ 1.0 ppm

Do not use in waters containing Koi and hybrid goldfish or other copper sensitive fish. Not intended for use in enclosed-type small volume, garden pond systems that typically operate with pumps and filters.

Typical Properties	Product Packaging
Appearance	Dark Blue Liquid
Odour	Citrus-like
Active Ingredient	Copper Ethanolamine Complex, mixed
Completely miscible	

### Advantages

- Visible reduction in algae growth 1 - 2 days after application.
- Once treated, water can be used immediately
- Double chelated formula
- Emulsified with penetrating surfactant which allows increased activity on 'hard to control' algae
- Registered with the South African Department of Agriculture, Forestry and Fisheries (DAFF) – Registration Number L9044 of Act 36/1947
- Meets South African National Standards SANS 241-1:2015 and SANS 241-2:2015 potable water standards

## Storage

Keep product tightly sealed in original containers. Do not put concentrate or dilute into food and drink containers. Do not reuse or refill container. Do not contaminate feed, feedstuffs, or drinking water. Do not store or transport near feed or food. Store product in a cool, dry, well-ventilated area at temperatures above 0°C. Store away and isolate from incompatible materials.

## Safety & First Aid Measures

Please consult product SDS. For further information on the effect of copper concentrations on the health of fish the South African Water Quality Guidelines – Agricultural Water Use: Aquaculture (Section Copper) should be consulted.

## Packaging

Citrine-Ultra™ Algaecide is supplied in 10L bottles, 2 units in a case.

## Product Code

Citrine-Ultra™ Algaecide: 13020E

A highly effective control for coarse (thick cell-walled) filamentous algae, mucilaginous (colonial) planktonic algae, and Chara and copper-sensitive vascular aquatic plants.

Citrine-Ultra™ Algaecide can be used in lakes, potable water reservoirs, ponds, fish hatcheries and raceways; crop and non-crop irrigation conveyance systems (ditches, canals and laterals).
