

HTH Scientific® Mini Reservoir Floater – Product Rebrand

New HTH Scientific® rebrand reaches the HTH Scientific® Mini Reservoir Floater

- Rebranded product – new, fresher look and feel
- Still the trusted bactericide and fungicide used for reservoirs and water storage tanks
- Conveniently packaged in disposable floater

Small yet powerful! The HTH Scientific® Mini Reservoir Floater is a floater that effectively disinfects reservoirs and water storage tanks ranging in sizes from 5,000 L–20,000 L. Due to a high concentration of the active ingredient, a relatively small amount of the product can effectively disinfect large amounts of water. Supplied in a case of 24 units.
